

Şekil Sayı Eşleştirme

 = 4	 = 1	 = 7	 = 9	 = 6	 = 3	 = 5	 = 8	 = 2	 = 0
------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------

Aşağıdaki uzun şifreleri hatasız çözerek altlarına yazın:

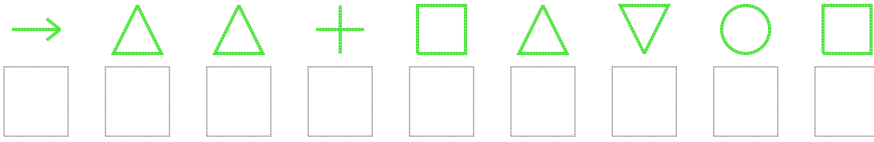

1. Şifre

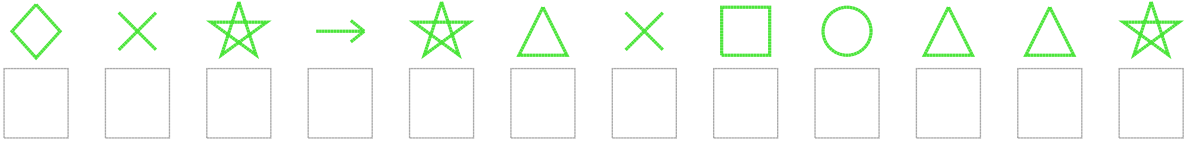

2. Şifre

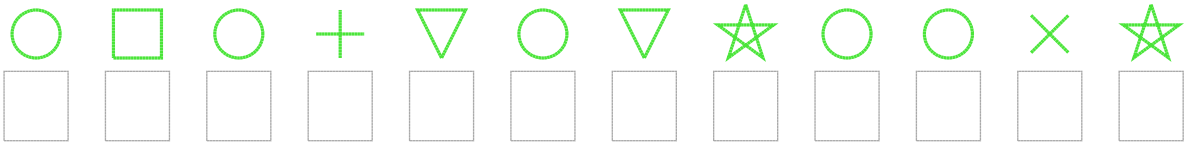

3. Şifre

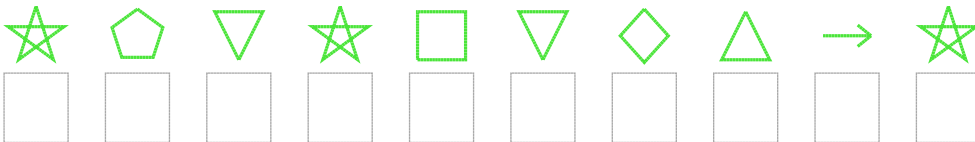

4. Şifre

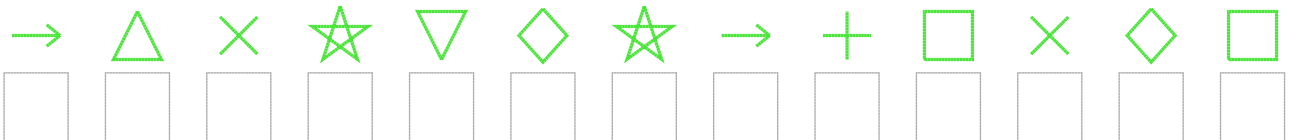

5. Şifre

6. Şifre

7. Şifre

□ BONUS: 1. ve 6. şifrenin üçüncü rakamının toplamı kaçtır?

Cevap Anahtarı

1. Şifre: 829357549
2. Şifre: 6607186419
3. Şifre: 088358725
4. Şifre: 194048952884
5. Şifre: 252372742294
6. Şifre: 4674571804
7. Şifre: 0894714035915

□ Bonus Soru Cevabı: 16
