

# Şekil Sayı Eşleştirme

 = 6	 = 1	 = 4	 = 2	 = 8	 = 0	 = 9	 = 5	 = 7	 = 3
------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------

Aşağıdaki uzun şifreleri hatasız çözerek altlarına yazın:

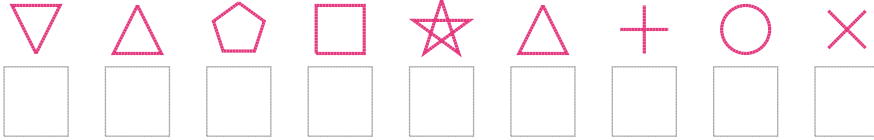

1. Şifre

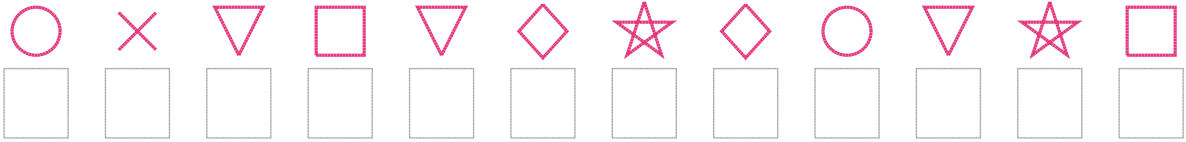

2. Şifre

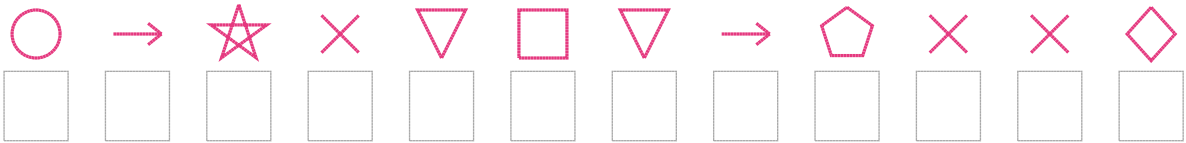

3. Şifre

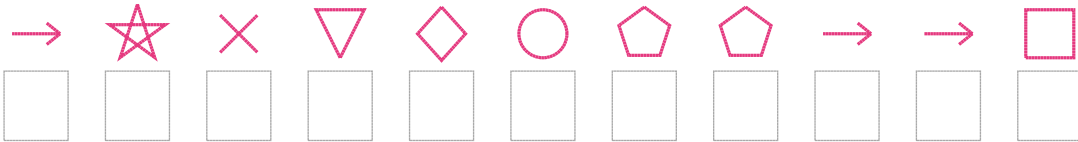

4. Şifre

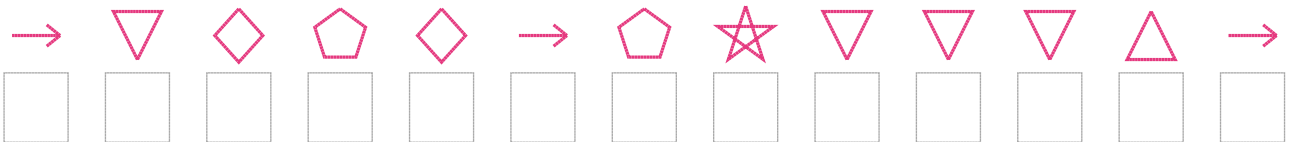

5. Şifre

6. Şifre

7. Şifre

□ BONUS: 3. ve 1. şifrenin üçüncü rakamının toplamı kaçtır? .....

## Cevap Anahtarı

1. Şifre: 7445949856
2. Şifre: 466809140348
3. Şifre: 719861235
4. Şifre: 357874643768
5. Şifre: 306578709554
6. Şifre: 06574399008
7. Şifre: 0749409677710

□ Bonus Soru Cevabı: 13
